Your life. Your door.

Decorative CPL doors

Varied and hard-wearing

LEBOLIT (CPL) is a multi-layered laminate, made of decor papers which have been impregnated with melamine resin, artificial resin or protective lacquers. Its construction is comparable with that of laminate floors and kitchen worktop surfaces and it is therefore ideally suited to areas which undergo a lot of hard wear.

LEBOLIT doors from LEBO suit every style of living thanks to our great range of decors and colours. Discover it for yourself!

The advantages of the Lebolit surfaces:

- > robust and easy-to-care
- > versatile in style
- > available as storey-high element and/or with various functions (e.g. soundproof, climate class, etc.)
- > also available as double-leaf door
- > and with attractive design variants with light openings or as wood-glass doors
- > with a high-value postforming edge PF06 or squared edge E

STS revetment

This new solution in various Lebolit surfaces is ideal to create a matching frame for our sliding doors used in 100mm-drywall sliding-door systems! For available surfaces, please check STS on the surfaces displayed on the right.
