LEBO doors

Made for your life

Dear customer, dear partner,

the time has come: You are holding our novelty catalogue 2018 in your hands!

Door leaf and frame have become much more than a „movable wall“ or a classic element of the interior construction. Therefore, our team at LEBO sees both as an integral part of the furnishing concept, which is used according to your own understanding.

In a modern interior, it is often better to let the door element merge discreetly with the space, as we show with our new series Aalto – a tribute to Alvar Aalto, one of the fathers of modernity. In some styles of living, however, the element may also take on the role of a fully valid furniture piece and major style element – like the models in our new Copenhagen series.

The LEBO team is constantly striving to put its excellent products in the right light. Often some details require a second look, such as hinges that are no longer visible, a pleasant feeling when opening and closing the door, or a particularly even-looking surface. Also in terms of accessories you will find interesting novelties that make our products even more attractive.

We wish you a lot of joy and inspiration while reading...

Ralf Schwung
Managing Director

Nordic Oak

Lebolit PREMIUM
Nordic Oak

Lebolit PREMIUM
Nordic Oak Cross

The Nordic Oak surface picks up the Scandinavian design trend: light-coloured, cool wood looks, which are excellent partners for other Nordic wood species such as spruce or pine, and harmonise with light-coloured and neutral colours such as grey, white or beige. An individual eyecatcher or targeted accents in dark grey, black or dark blue make the look even more interesting.

The particular **advantages**:

- ✓ great alternatives to CPL white
- ✓ completes the LEBO CPL product range perfectly by adding a greyish decor with wood texture
- ✓ Apart from the price, almost indistinguishable from real wood
- ✓ hard-wearing properties of CPL and thus particularly durable

Copenhagen series

Copenhagen 31, White Lacquer 9010, single leaf, Frame RP 17, Hinges V4426 WF

Copenhagen series – life in the Nordic country house style

The Nordic style is characterised by light and natural colours, coupled with unpretentious design and clear shapes. This ambience fulfils your need for a light and pleasant mood. The Copenhagen series fits perfectly into this furnishing: the wide milling has clear lines, the plain design is nevertheless homely.

The particular **advantages:**

- ✓ Available in White Lacquer 9010 and 9016, and RAL/NCS
- ✓ Particularly harmonious in combination with the RP17 frame
- ✓ Lush, multi-coat lacquering
- ✓ Discreet 25mm milling
- ✓ Attractive value for money offer for country house doors

Aalto series

Aalto: frame White Lacquer 9010, glass satinated, hinges TEG 310 2D
Element in full flush, White Lacquer 9010

Aalto series – flush surface unites function and aesthetics

- ✓ As the door leaf, frame and hinges lie in one plane, the Aalto series forms a perfect partner for our other flush elements.
- ✓ The stylish handle and the minimalistic hinges integrate far more harmoniously into the element than conventional solutions.
- ✓ The closing magnet and magnet plate on the door enable non-contact and noiseless closing

The particular **properties**:

- ✓ Maximum load value of 60 kg, which corresponds to a dimension of 10 x 1,000 x 2,300 mm
- ✓ 8 mm and 10 mm ESG (tempered security glass) can be used
- ✓ The U-profile of the hinge retains the door leaf and ensures that the full-glass door leaf sits perfectly.
- ✓ The clamps enable simple and individual setting of the correct door position
- ✓ Secure fixing

The **uncomplicated handling**:

- ✓ There are absolutely no drillholes, so that no more devices are necessary. Use of the magnetic closure and a bondable handle does not require any machining of the glass
- ✓ The opening direction and hinge side thus remain variable (distinction of the door leaf between right-hung and left-hung no longer necessary)

Aalto: frame Mixture Anthracite, glass satinated, hinges TEG 310 2D

New accessories

It is worthwhile to pay attention to small details so that you will enjoy your door elements for a long time. And to ensure that everything fits, in addition to all kinds of different locks, design hinges and push-bars, we also offer the suitable **door handles**.

Your **advantages**:

- ✓ Handles fit to the lock – guaranteed
- ✓ Coordinated design of the handles for full-glass and wooden doors!

Tectus 380 3D

Our **Tectus hinge for rebated internal residential doors** is also **NEW!**

The particular **advantages**:

- ✓ Completely concealed hinge system for rebated internal residential doors
- ✓ For wooden, steel and aluminium frames
- ✓ Hinge pocket closed at the side for a homogeneous look
- ✓ Easy 3D adjustment (side +/- 3.0 mm, height +/- 3.0 mm, pressure +/- 1.0 mm)
- ✓ Maintenance-free bearings technology
- ✓ Load capacity: 60.0 kg
- ✓ Opening angle: 180°
